What we know as Dihydrotestosterone or DHT, is a hormone synthesized from male testosterone. Androgenetic Alopecia or Male Pattern Balding is indicated by an increased level of DHT in the scalp. This increase causes unsightly bald patches, increased hair fall, receding hairlines and other common signs of balding.

5-Alpha Reductase - an enzyme naturally produced in the human body, reacts with testosterone to produce DHT. Common Natural DHT Blockers or DHT Inhibitors like Procerin, Avocor, are popular natural DHT Blockers and exhibit the capacity to block the synthesis of testosterone into DHT by inhibiting the 5-Alpha Reductase activity.

The only natural DHT Blocker specially suited for male pattern balding and hair loss in men is Procerin. Men of all ages and at all stages of hair loss can benefit from Procerin which has been tested and found to have no side effects. .

Other topical treatments like Revivogen, Crinagen, Progesterone Creams and Xandrox also lay claim to minimizing or blocking the amount of Dihydrotestosterone (DHT) production.

Procerin is for male hair loss. An exclusive natural DHT blocker for men it focuses on the reducing DHT in the scalp region where DHT binds with follicular tissue to inhibit hair regrowth and cause hair fall.

Procerin, with Saw Palmetto, Magnesium, Zinc Sulfate, Vitamin B-6, Pyroxidine 5mg, CJ-11 Factor, CJ-9 Factor, and a proprietary blend of Gotu Kola, Nettles, Pumpkin seed meal, Siberian Ginseng, Yohimbe, Muira Puma Root, Uwa Ursi and more as its ingredients, is a mix of natural DHT blockers, vitamins and herbal/mineral supplements.

Procerin with its various vitamins, minerals and herbal extracts blocks DHT naturally and encourages hair regrowth as well. The factors responsible for hair loss in men, which generally starts around 18 years and goes well into the late thirties, could be either genetic, dietary, lifestyle oriented or due to medication.

Procerin, used early, ensures the best possible results. Procerin is an all natural hair regrowth supplement and a natural DHT Blocker which combines more than seventeen ingredients and is consumable as a pill form or applicable as a topical solution on the scalp.

Procerin - blocks DHT, naturally.
